Student Spotlight: Caroline Stephens

My name is Caroline Stephens and I am currently a sophomore Civil Engineering Student. My concentrations are in Water Resources and Environmental. I recently had the opportunity to attend an ASCE leadership conference in Buffalo, New York which hosted a workshop for student chapter leaders. There I learned many useful skills in leadership. The intent of the conference was to help students learn ways to improve their student chapter on campus, and I hope to use those skills to help our student chapter. Additionally, we had many opportunities to network with professionals and other students in our field as well as receiving interview and resume help. Combined with the winter activities such as ice skating and seeing Niagara Falls it was a wonderful experience. I learned a lot and hope to take my new skills and use them in the future.
